RE: Staff's First Set of Data Requests to ExteNet Systems, Inc
Docket No. T-20597A-08-0320

DOCKETED BY

mn

Dear Ms. Genung:

The purpose of this letter is to provide ExteNet Systems, Inc.'s ("ExteNet") response to the data request dated July 22, 2008, regarding ExteNet's Application and Petition for Certificate of Convenience and Necessity to Provide Intrastate Telecommunications Services ("Application") filed on or around June 20, 2008.

PJG 1.1 Please indicate the total number of employees of ExteNet and its affiliates.

ExteNet and its affiliates have forty (40) employees and four (4) full-time independent contractors.

PJG 1.2 Please describe ExteNet's plan for providing customer service to its customers in Arizona.

ExteNet's customers are generally wireless service providers. Typically, ExteNet provides customer service by monitoring the unswitched point-to-point telecommunications services that comprise the distributed antenna system ("DAS") networks utilized by its customers. ExteNet's network operation center ("NOC") receives alerts 24/7/365 if there are problems with the network and takes immediate steps to resolve any issue.

ExteNet's customers may also reach ExteNet's NOC on a 24/7/365 basis by calling 866-892-5327 (866- 89CLEAR). The general public may reach ExteNet at 630-505-3800 between the hours of 8:00AM and 5:00PM Central Time.

PJG 1.3 Does ExteNet plan to have a customer service center in Arizona?

ExteNet's NOC is located within its corporate headquarters in Lisle, Illinois. ExteNet does not have any plans to establish a customer service center in Arizona.

PJG 1.4 Does ExteNet plan to have employees in Arizona? If so, please indicate how many.

ExteNet currently has two (2) employees in Arizona. ExteNet does not have a specific plan to increase the number of employees in Arizona at this time.

PJG 1.5–PJG 1.7

These data requests involved corrections to ExteNet's tariff attached to the Application. These corrections have been made and a copy of the corrected tariff is being filed simultaneously with this letter.

PJG 1.8 Is it ExteNet's intention to use the maximum rates that were filed in the proposed tariff within its Application as ExteNet's actual rates? If not, please submit replacement tariff pages containing the actual rates.

ExteNet provides unswitched point-to-point telecommunications services and proposes to offer customized services to meet individualized needs of carrier customers in Arizona. ExteNet's customers are all sophisticated wireless service providers who negotiate contract rates on an individual case basis ("ICB") with ExteNet. See Exhibit E of the Application for a full description.

Nevertheless, for the potential ExteNet customer that does not need individualized offerings and therefore does not require an ICB contract to meet its needs, , such customer may purchase services through Extenet's tariff. The tariff rate schedules reflect the maximum rates ExteNet will charge for such services outlined and itemized on Original Sheet 32, section 4.1.4 of ExteNet's corrected tariff being filed simultaneously with this letter.

PJG 1.9 Please explain how ExteNet calculated the maximum and actual rates that will be contained in ExteNet's tariff for each of its services.

ExteNet calculated its maximum tariff rates similar to frame relay circuits so that a customer's rate is based upon the amount of bandwidth consumed as well as construction and connection charges. For this type of telecommunications service, there are charges for the originating and terminating connections, recurring charges for the two ends and the circuit itself, and a charge for the bandwidth used, assuming a migration to a fiber-optic based wavelength service at a point in the future. ExteNet also provides rates for dark and dim fiber as well as dedicated strand fiber, which is ExteNet's primary form of delivery.

PJG 1.10 Please indicate why you believe that your range of rates is just and reasonable using a competitive market analysis. Your analysis should contain publicly available examples of tariff rates and charges charged by the incumbent and other carriers for similar services. Please provide actual tariff pages and use the attached matrix format to show your actual or proposed tariff rates and charges. At a minimum, show tariff information of Qwest and two other competitors in Arizona.

ExteNet has attached Attachments A & B. Attachment A is not applicable to ExteNet because it doesn't provide any residential services. ExteNet provides unswitched point-to-point telecommunications services to other telecommunications carriers, typically by constructing DAS networks that are leased to wireless service providers. Therefore, the categories listed in Attachment B are not applicable to ExteNet. ExteNet inserted applicable categories into Exhibit B based upon rough categories used to describe the services offered by ExteNet and its competitors, NextG Networks of California, Inc. and NewPath Networks LLC. Within ExteNet's industry, services are highly customized in ICB contracts, so there is no standard method for charging for individual services. The categories are approximate and a "best measure" given that ExteNet does not have detailed access to either company's complete cost-setting structure.

The tariff information of ExteNet's competitors was taken from pages of the respective tariffs (see attached) provided in NewPath Networks LLC's initial Application and Petition for Certificate of Convenience and Necessity, Docket No. T-20567A-07-0662 filed November 26, 2007 and NextG Networks of California, Inc.'s response to the First Staff Data Request, Docket No. T-20377A-05-0484 filed October 17, 2005.

ExteNet reviewed Qwest's tariff and could not find rates for services comparable to ExteNet's because Qwest does not offer services similar to ExteNet's services. Therefore, ExteNet marked that portion of Attachment B "N/A."

The extent that ExteNet's rates are competitive cannot be deduced by trying to compare the tariff rates of ExteNet, its competitors, and Qwest because the reality of the market place is that rates are set in ICB contracts. ExteNet begins the process of acquiring a new customer by participating in a competitive bidding process, such as responding to a request for proposal, wherein ExteNet competes with companies offering similar services, such as NextG Networks of California, Inc. and NewPath Networks LLC.

ExteNet's customers are sophisticated wireless services providers experienced in negotiating charges and other contract terms for dedicated point-to-point telecommunications services, such as those provided by a DAS network. Its customers also have adequate resources to protect their business interests and negotiate the best market prices for services.

Given that ExteNet must compete in a highly competitive bid process against multiple competitors, including, but not limited to, both NextG Networks of California, Inc. and NewPath Networks LLC to win new customers and negotiate each ICB contract with sophisticated and experienced industry participants. These market forces will ensure that ExteNet's rates are just and reasonable.

PJG 1.11 Please identify all other states/jurisdictions in which the Company or an affiliate provides telecommunications services. Please specify, in the attached matrix format, the tariff rates and charges that the Company and/or affiliate charges for telecommunications services in these other jurisdictions. If there is a difference between the tariff rates and charges that the Company and/or affiliate charges in other jurisdictions for telecommunications services, please explain why you are charging different tariff rates and charges in Arizona.

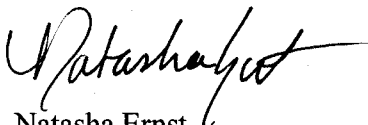

ExteNet has attached Attachments C & D. Attachment C is not applicable to ExteNet because it doesn't provide any residential services. The categories of service specified in Attachment D are not applicable to ExteNet; therefore, a revised service list has been inserted.

ExteNet identified all other states/jurisdictions in which it or its affiliate provides telecommunications services in its answer to question A-19 of its Application filed on or around June 20, 2008. These states are California, Florida, Massachusetts, Michigan, Nevada, New York, and Texas. Florida, Nevada, and Texas do not require tariffs. To the extent a tariff is required, ExteNet's tariff rates are the same for all jurisdictions as outlined and itemized on Original Sheet 32, section 4.1.4 of ExteNet's corrected tariff being filed simultaneously with this letter.

As discussed above, ExteNet negotiates ICB contracts for all its telecommunications services. These contracts vary based upon circumstances specific to individual DAS networks; however, rates do not exceed the maximum rates established by the tariff rates.

ExteNet is providing an original plus 13 copies of this response and all attachments. It is also including a copy to be date stamped and returned in the pre-addressed, postage paid envelop enclosed. If you have any questions regarding ExteNet's responses, please do not hesitate to contact Natasha Ernst at 630-505-3844 or by email: nernst@extenetsystems.com.

Best regards,

Natasha Ernst

TARIFF FORMAT

This tariff is divided into the following major sections:

General

Section 1: Definitions

Section 2: General Regulations

Section 3: Rules

Section 4: Rate Schedules

- A. Sheet Numbering:** Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would 14.1.
- B. Sheet Revision Numbers:** Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the Arizona Corporation Commission. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc., the Arizona Corporation Commission follows in their tariff approval process, the most current sheet number on file with the Arizona Corporation Commission is not always the tariff sheet in effect. Consult the Check Sheet for the sheet currently in effect.
- C. Paragraph Numbering Sequence:** There are seven levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2
 - 2.1
 - 2.1.1
 - 2.1.1.1
 - 2.1.1.1.1
 - 2.1.1.1.1.1
 - 2.1.1.1.1.1.1
- D. Check Sheets:** When a tariff filing is made with the Arizona Corporation Commission, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision.

2.4 SPECIAL ARRANGEMENTS AND CONSTRUCTION

Special arrangements will be developed on a case-by-case basis in response to a bona fide special request from a Customer or prospective Customer to develop a competitive bid for a service not generally available under this Tariff. Such payment is not a service deposit or pre-payment against which service charges will be billed. Rates and charges for special arrangements or special construction will be set forth in writing in individual contracts. Special arrangements will be offered on a non-discriminatory basis to similarly situated Customers in substantially similar circumstances. Upon reasonable request, Company will make available to the Commission and its staff copies of customer contracts designated as protected data pursuant to the Minnesota Government Data Practices Act, Minnesota Statutes Section 13.37.

Where the Company furnishes a facility or service under a special arrangement or special construction, charges will be based on the costs incurred by the Company and may include: (1) non-recurring charges; (2) monthly recurring charges; (3) termination liabilities; or (4) combinations thereof.

- 2.5.3 The applicable termination liability will be calculated based on the following:

Contracts will be used for Individual Case Basis ("ICB") service offerings or Special Construction. Contracts will be offered in response to the specific, individual requirements of the customer. Such contract rates or customer-specific pricing differs from the Company's standard or general tariffed offerings because they are based on special circumstances such as a volume or term commitment, or a Customer-specific service arrangement. The terms and conditions of each contract offering are subject to the agreement of both the Customer and Company.

4 RATE SCHEDULES

4.1 SCHEDULE 1: DEDICATED POINT-TO-POINT PERMANENT VIRTUAL CIRCUIT ("PVC") TRANSPORT SERVICE

4.1.1 Service Description

Dedicated Point-To-Point PVC Transport Service is available on the Company's Distributed Antenna Systems. Dedicated Point-To-Point PVC Transport Service begins at a Company Hub. Customers are responsible for providing or obtaining circuits to connect from their networks to the Company Hub. The Hub contains Customers' circuit terminating equipment, Base Transceiver Station and related peripheral equipment, as well as Company's and/or Customer's RF/Optical conversion equipment. The RF/Optical conversion equipment converts Customers' RF signals into optical signals, and places those signals into a PVC that traverses Company DAS network facilities between the Hub and one or more Points of Presence ("POPs").

4.1.2 Monthly Recurring Rate Elements

The following monthly recurring rate elements apply to Dedicated Point-To-Point PVC Transport Service:

4.1.2.1 Signal Conversion Rate

Signal Conversion Rates apply where Company owns the RF/optical conversion equipment. Signal Conversion Rates are not applicable when the Customer owns the RF/optical conversion equipment.

4.1.2.2 Local Signal Conversion Rate

A Local Signal Conversion Rates applies when the RF/optical conversion equipment located at the Hub is owned and operated by Company.

4.1.2.3 Remote Signal Conversion Rates

Remote Signal Conversion Rates apply when the RF/optical conversion equipment located at the POPs distributed throughout a Company network is owned and operated by Company.

4. RATE SCHEDULES (cont'd.)

4.1 Schedule 1: Dedicated Point-To-Point Permanent Virtual Circuit ("PVC") Transport Service (cont'd.)

4.1.2 Monthly Recurring Rate Elements (cont'd.)

4.1.2.4 Committed Information Rate

The Committed Information Rate ("CIR") of a PVC is the amount of bandwidth selected by Customer to carry the RF traffic that is optically converted and transported over the Company DAS network, stated in MegaHertz ("MHZ") and made available in Tiers (increments) of 5 MHZ to 60 MHZ per PVC.

4.1.2.5 Permanent Virtual Circuit ("PVC") Rate Elements

PVC Rate Elements relate to both the physical layer and the bandwidth required to create a PVC to transport Customer's CIR from the Hub to one or more POPs on the Company DAS network. The rate elements that will apply depend on the type of optical conversion and multiplexing methodology used to aggregate one or more Customer CIR Tiers over a PVC to one or more POPs.

4.1.2.5.1 Dedicated Strand Charge

The Dedicated Strand Charge applies to PVCs utilizing one or more dim or dark fibers between the Hub and the POP(s).

4.1.2.5.2 Wave Division Multiplexed ("WDM") Charge

The WDM Charge applies to PVCs utilizing one or more lambdas engineered with WDM technology and equipment on a fiber between the Hub and the POP(s). The WDM charge applies to all current and future variations of WDM, including but not limited to Coarse Wave and Dense Wave Division Multiplexing in both analog and digital transport topologies.

4.1.2.5.3 SONET Ring Charge

The SONET Ring Charge applies to a PVC deployed on a SONET ring network configuration, using Dedicated Strand(s) or WDM, engineered in a point to multi-point configuration. SONET Ring PVCs may be provisioned using customary add/drop, physical interconnect or WDM technology for both originating and terminating traffic, from a Hub to one or more POPs connected to the SONET Ring.

A Lateral Construction Charge applies where POPs requested by Customer are to be integrated into a Company network and the cost of construction of the lateral and/or building riser facilities cannot reasonably be recovered by Company over the expected duration of service to Customer.

4.1.3.2 Lateral Connection Charge

A Lateral Connection Charge applies where POPs requested by Customer are to be integrated into a Company network and the cost of (i) interconnecting to circuits or facilities not owned by Company, and/or (ii) non-standard interconnection requested by Customer, cannot reasonably be recovered by Company over the expected duration of service to Customer.
